

Unit weight measures Bucket

- Comparable to ASTM C29 and ASTM C138.

Made from heavy steel sheet, they are used to determine the **weight per cubic metro of freshly mixed and compacted concrete**, and as per ASTM Standards also the air content of fresh concrete.

Multiple capacities and weights are available:

Models	Capacity litres	Inside diameter mm	Useful height mm	Sheet thick mm	Weight Kg
C202	5	187.7	180.7	3	4
C203	10	265	181.3	4	7
C205	20	345.6	298.5	5	14
